

EZ-mount E-Stops

30 mm Mount E-Stop Buttons

- Push-to-stop, twist-to-release or pull-to-release operation per IEC 60947-5-5
- "Safe Break Action" ensures NC contacts will open if the contact block is damaged or separated from the actuator
- Rugged design; easy installation with no assembly or individual wiring required
- Models designed to interface with Safety BUS nodes/gateways
- Models with YELLOW and RED indication of actuation (armed or depressed/latched button) and machine status (optional)
- Model with RED LED indication of actuation (depressed/latched button)
